

## ENERGY AND ENVIRONMENTAL POLICY

Sütaş A.Ş. perceives resources such as earth, water and air as borrowed from the nature; it conducts its business with the principle of "returning to nature what nature gave us". In this context, it is committed to review and continuously improve the energy and environmental performance and practices, to guarantee the provision of necessary resources to achieve objectives and targets, to comply with all applicable international and national compliance obligations, to identify the environmental aspects of its activities and products, to generate goals, objectives and programs for these aspects.

Based on these commitments, Sütaş A.Ş. is obliged to;

- Implement and continuously improve an energy management system based on ISO 50001 and an environmental management system based on ISO 14001,
- Ensure the availability and the accessibility of necessary information, documents and resources to achieve energy and environmental objectives,
- Increase awareness in its stakeholders about the impacts of energy use, about the protection of the environment and to meet their expectations,
- Contribute to the protection of the environment against global warming and other disruptive impacts,
- Implement a systematic waste management system in order to minimize wastes, to prevent pollution in its source and to reduce its negative impact on environment,
- To purchase energy efficient products and services,
- Ensure the use of renewable / alternative energy sources,
- Conduct studies to meet heat and electricity needs from the company's own wastes,
- Keep the environmental aspects of future products, processes and activities under control and minimize their environmental impact,
- Reduce the use of packaging and waste, ensure that they are recycled and re-used.
